## Summary by section

| Section                        | ✅ OK | ⚠️ Warn | ❌ Crit |
|--------------------------------|------|---------|--------|
| BOSH Director                  | 8    | 0       | 0      |
| VM & Process Health            | 1    | 0       | 0      |
| VM Resource Utilization        | 5    | 0       | 0      |
| Allocated vs Utilized (per VM) | 5    | 0       | 0      |
| Diego Cells                    | 0    | 1       | 0      |
| Cloud Foundry API              | 1    | 0       | 0      |
| Upgrade Readiness              | 3    | 1       | 0      |
| Certificates                   | 1    | 0       | 0      |
| MySQL / Galera Cluster         | 0    | 0       | 0      |

### 1. BOSH Director

- ✅ Director reachable: p-bosh (v282.1.11 (00000000), vsphere\_cpi)
- ✅ No active deployment locks.
- ✅ No in-flight BOSH tasks.
- ✅ disk /var/vcap/store: 45% used
- ✅ disk /var/vcap/data: 11% used
- ✅ disk /: 71% used
- ✅ memory: 38% (2979/7937 MB)
- ✅ monit: all 23 director processes running

*Director VM: memory 38% (2979/7937 MB), load 0.08 over 2 vCPU, 23 monit processes running.*

### 2. VM & Process Health

- ✅ [cf-bfa9f18ae9bf61f7f155] all 5 VM(s) and their processes are running.

### 3. VM Resource Utilization

| Instance           | VM Type     | CPU% | Mem% | Eph% | Per% | Sys% | Load |
|--------------------|-------------|------|------|------|------|------|------|
| blobstore/dfcb4200 | medium      | 1    | 15   | 9    | 14   | 59   | 0.02 |
| compute/587be4c3   | xlarge.disk | 5    | 19   | 16   | –    | 59   | 0.87 |
| control/0255a463   | 2xlarge     | 4    | 36   | 54   | –    | 59   | 0.41 |
| database/7e095dd2  | large       | 4    | 25   | 19   | 11   | 59   | 0.34 |
| router/c5e4e221    | medium      | 3    | 15   | 10   | –    | 59   | 0.02 |

- ✅ [cf-bfa9f18ae9bf61f7f155] blobstore within thresholds (cpu 1% mem 15% eph 9% per 14% sys 59%)
- ✅ [cf-bfa9f18ae9bf61f7f155] compute within thresholds (cpu 5% mem 19% eph 16% per –% sys 59%)
- ✅ [cf-bfa9f18ae9bf61f7f155] control within thresholds (cpu 4% mem 36% eph 54% per –% sys 59%)
- ✅ [cf-bfa9f18ae9bf61f7f155] database within thresholds (cpu 4% mem 25% eph 19% per 11% sys 59%)
- ✅ [cf-bfa9f18ae9bf61f7f155] router within thresholds (cpu 3% mem 15% eph 10% per –% sys 59%)

Thresholds — mem 85/95%, disk 80/90%, cpu 80/95% (WARN/CRIT).

### 4. Allocated vs Utilized

| Instance           | VM Type     | RAM used | RAM alloc | Ephem used | Ephem alloc | RAM ratio |
|--------------------|-------------|----------|-----------|------------|-------------|-----------|
| blobstore/dfcb4200 | medium      | 600 MB   | 4.0 GB    | 737 MB     | 8.0 GB      | 15%       |
| compute/587be4c3   | xlarge.disk | 3.0 GB   | 16.0 GB   | 20.5 GB    | 128.0 GB    | 19%       |
| control/0255a463   | 2xlarge     | 12.0 GB  | 32.0 GB   | 34.6 GB    | 64.0 GB     | 38%       |
| database/7e095dd2  | large       | 2.0 GB   | 8.0 GB    | 3.0 GB     | 16.0 GB     | 25%       |
| router/c5e4e221    | medium      | 589 MB   | 4.0 GB    | 819 MB     | 8.0 GB      | 14%       |

- ✅ [cf-bfa9f18ae9bf61f7f155] blobstore RAM allocation 15% used (600 MB of 4.0 GB)
- ✅ [cf-bfa9f18ae9bf61f7f155] compute RAM allocation 19% used (3.0 GB of 16.0 GB)

-  [cf-bfa9f18ae9bf61f7f155] control RAM allocation 38% used (12.0 GB of 32.0 GB)
-  [cf-bfa9f18ae9bf61f7f155] database RAM allocation 25% used (2.0 GB of 8.0 GB)
-  [cf-bfa9f18ae9bf61f7f155] router RAM allocation 14% used (589 MB of 4.0 GB)

## 5. Diego Cells

**Cells:** 1 · reserved/capacity 9.1 GB / 15.6 GB (58%) · available 6.5 GB · LRPs: RUNNING=17

| Cell     | Reserved | Capacity | Available | Containers | Reserved% |
|----------|----------|----------|-----------|------------|-----------|
| 587be4c3 | 9.1 GB   | 15.6 GB  | 6.5 GB    | 17/249     | 58%       |

-  Only 1 Diego cell — no peer to evacuate to, so apps WILL restart when it is recreated (expected for single-cell/small-footprint; schedule a maintenance window).

## 6. Cloud Foundry API

-  CF API reachable: <https://api.system.skynetsystems.io> (v3.207.0) as admin

*Orgs: 1 · Spaces: 6 · Apps: 12.*

## 7. Upgrade Readiness

-  Staged change: Small Footprint VMware Tanzu Application Service [cf] — DELETE (currently v6.0.23) (deployment 'cf-bfa9f18ae9bf61f7f155'). Apply or revert before upgrading.
-  Stemcells consistent: ubuntu-jammy/1.1193\*
-  No orphaned persistent disks.
-  No ignored instances — every VM will be updated during the upgrade.

**Stemcells in use:**

| Deployment              | Stemcell                                       |
|-------------------------|------------------------------------------------|
| cf-bfa9f18ae9bf61f7f155 | bosh-vsphere-esxi-ubuntu-jammy-go_agent/1.1193 |

## 8. Certificates

-  No certificates expiring within 1m.

## 9. MySQL / Galera Cluster
