

PCF FOG Foundation Health Check

⚠ Verdict: CAUTION — PROCEED WITH CAUTION — 4 warning(s); review before upgrading.

Health score: 84%

Director	<code>192.168.2.2</code> — p-bosh v282.1.11 (00000000) (vsphere_cpi)
Generated	2026-06-05 04:42 UTC
Run on	<code>ubuntu@opsman-skynetsystems-io</code>
Deployments	cf-6f11f8e43cd7b626077b
Stemcell(s) in use	bosh-vsphere-esxi-ubuntu-jammy-go_agent/1.1193
Checks (OK / Warn / Crit)	54 / 4 / 0
Health score	84%

Summary by section

Section	✅ OK	⚠️ Warn	❌ Crit
BOSH Director	7	2	0
VM & Process Health	1	0	0
VM Resource Utilization	20	0	0
Allocated vs Utilized (per VM)	20	0	0
Diego Cells	1	0	0
Cloud Foundry API	1	0	0
Upgrade Readiness	2	2	0
Certificates	1	0	0
MySQL / Galera Cluster	1	0	0

1. BOSH Director

- ✅ Director reachable: p-bosh (v282.1.11 (00000000)), vsphere_cpi)
- ✅ No active deployment locks.
- ✅ No in-flight BOSH tasks.
- ⚠️ 8 of the last 25 BOSH tasks ended in 'error' (review with: bosh tasks --recent=25).
- ⚠️ Director VM disk /var/vcap/store at 84% used.
- ✅ disk /var/vcap/data: 11% used
- ✅ disk /: 71% used
- ✅ memory: 36% (2868/7937 MB)
- ✅ monit: all 23 director processes running

Director VM: memory 36% (2868/7937 MB), load 0.05 over 2 vCPU, 23 monit processes running.

2. VM & Process Health

- ✅ [cf-6f11f8e43cd7b626077b] all 20 VM(s) and their processes are running.

3. VM Resource Utilization

Instance	VM Type	CPU%	Mem%	Eph%	Per%	Sys%	Load
clock_global/3586f01c	medium.disk	2	23	20	–	59	1.57

-  [cf-6f11f8e43cd7b626077b] uaa RAM allocation 27% used (1.1 GB of 4.0 GB)

5. Diego Cells

Cells: 2 · reserved/capacity 0 MB / 62.7 GB (0%) · available 62.7 GB · LRPs: n/a

Cell	Reserved	Capacity	Available	Containers	Reserved%
05570c4e	0 MB	31.3 GB	31.3 GB	0/249	0%
dec53b4d	0 MB	31.3 GB	31.3 GB	0/249	0%

-  Available 62.7 GB >= largest cell 31.3 GB — a cell can be drained during a rolling upgrade without exhausting placement capacity.

6. Cloud Foundry API

-  CF API reachable: <https://api.system.skynetsystems.io> (v3.160.0) as admin

Orgs: 1 · Spaces: 0 · Apps: 0.

7. Upgrade Readiness

-  Staged change: VMware Tanzu Application Service [cf] — update v6.0.0 → v6.0.0 (deployment 'cf-6f11f8e43cd7b626077b') · 12 errand(s) will run. Apply or revert before upgrading.
-  Stemcells consistent: ubuntu-jammy/1.1193*
-  2 orphaned persistent disk(s) — review with 'bosh disks --orphaned' / 'bosh clean-up'.
-  No ignored instances — every VM will be updated during the upgrade.

Stemcells in use:

Deployment	Stemcell
cf-6f11f8e43cd7b626077b	bosh-vsphere-esxi-ubuntu-jammy-go_agent/1.1193

8. Certificates

-  No certificates expiring within 1m.

9. MySQL / Galera Cluster

-  mysql-diag: Galera cluster healthy on mysql_monitor (0 node(s) reported Synced).

Generated by pcf-health-check.sh — read-only pre-upgrade health check.
